Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p>Concern No. 45327 Concern Info In November, Daniel Simmons with your office came out to my home (35101 E Neil Chiles Rd, Buckner MO) because of a complaint regarding our neighbors have a collection site for burning of mulch and sections of large limbs and tree trunks fr a commercial tree trimming company. The tree trimming company is now using a truck that has a mounted crane to unloac the tree trunks and limbs. I had collected pictures of the size of the pile and them burning at night. The issue is that the smoke plows our direction and our house inside smells like smoke. At that time, Daniel stated there was nothing he could do unless he personal saw that the pile was greater than 80 cubic feet or the fire department was called out for night burnir and made a report. Do to the cold weather the last few months, there has been very little burning. The burning has begun again and we have called the Fort Osage Fire Protection District and they came out on two occasions (most recent 2/28) b didn't put the fire out even though it was dark approximately 7:15 pm. I believe the pile today is larger than 80 cubic feet. I sent Daniel an email on 2/28 requesting that he comes out tomorrow to inspect but I'm unsure if he will be able to get out. I'm looking for assistance in how we proceed since calling the fire department hasn't worked and we can't get anyone from DNR to respond when the pile is large</p> <p>Comments Vegetative trade waste was allowed smolder after sunset, which is a violation of 10 CSR 10-6.045, Open Burning Requirements. A Letter of Warning l been issued to Jeremy Gist.</p>								
KCRO	3/3/2021	3/2/2021	Ideker - Mosby North Quarry	Mosby Clay	Fugitive Particulate Matter	JS		
<p>Concern No. 45323 Concern Info Caller reports that dust from the quarry has been bad all day since about 11 a.m. There was a blast around 3:30 - 4 p.m. th cause a lot of dust to hang in the air. Dust is also coming from operational activities at the quarry.</p> <p>Comments No violations were observed during the investigation.</p>

Concerns Investigated Between February 16, 2021 and March 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 45355 Concern Info Voicemail left on KCRO main line: I'm calling about the AA rock quarry, situated on Hwy AA off of 50 Hwy - as we understand, the dust is not supposed to leave the ground and there is a huge dust cloud - I have pictures - please give them a call and let them know they are in violation								
Comments No violations were noticed at the time of investigation.								
KCRO		3/4/2021	Brad Judd	Pickering Nodaway	Open Burning	JS		
Concern No. 45356 Concern Info Caller reports that Bradd Judd burned down the house at 302 South Harmon last night (03/03/2021). The fire took off very and burned very hot, so an accelerant was probably used. The fire included asbestos roofing. The fire quickly spread out of control. A neighboring house caught fire, displaced the family, and killed the dog. The Union Township Fire Department responded and was assisted by Hopkins Fire Department and Maryville Fire Department. The Nodaway County Sheriff Department also responded. One firefighter became overheated fighting the fire.								
Comments								
KCRO	3/8/2021	3/5/2021	Snowball Hill Prairie	Harrisonville Cass	Open Burning	CK		
Concern No. 45403 Concern Info Kansas Prairie Grass Association burned 37 piles of railroad ties. They have been burning for three days. The Kansas Prairie Grass Association started the fires and the Central Cass County Fire Department helped								
Comments This appears to of been an accidental event which resulted in the burning of multiple piles of old railroad ties along the railroad tracks that runs across the acreage.

Concerns Investigated Between
February 16, 2021 and March 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
KCRO	3/11/2021	3/8/2021	Darren McCray	De Kalb Buchanan	Open Burning	DS		

Concern No. 45402 **Concern Info** On 8 February 2021 at 1805 hours, fire personnel from the DeKalb Fire Protection District were dispatched to the listed location in reference to an illegal burn.

Upon arrival, fire personnel extinguished a debris fire that consisted of a car frame, approximately five to six tires, wood, and other unknown debris.

It is not known how the fire started.

This report was forwarded to DNR due to the items being burned violate state and federal laws regarding air quality.

Comments Darren McCray will receive a letter of unsatisfactory findings, response required, for violating Missouri's open burning regulation

KCRO	3/9/2021	3/9/2021	Republic Foods - Valley Oaks Steak Company	Lone Jack Johnson	Odor	JH		
------	----------	----------	--	-------------------	------	----	--	--

Concern No. 45398 **Concern Info** Horrible odor at my house. Smell is coming from republic foods factory 2 miles away

Comments The odor was similar to feed lot odor. If the odor is from the cattle feed lot, then it is exempt from the Missouri Air Conservation Commission regulations. The odor was light and intermittent. The odor was too light and was not present long enough to use the nasal ranger. There was no odor violation note.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 45399 Concern Info Horrible stench at my house and garage. The smell is horrible								
Comments The odor was similar to feed lot odor. If the odor is from the cattle feed lot, then it is exempt from the Missouri Air Conservation Commission regulations. The odor was light and intermittent. The odor was too light and was not present long enough to use the nasal ranger, There was no odor violation note								
KCRO	3/11/2021	3/9/2021	Environmental Consortium	Gladstone Clay	Asbestos	JS		
Concern No. 45400 Concern Info Caller states that property owner had hired company to do an environmental assessment and another company to do demolition on two properties, then decided that it cost too much and has decided to do the demolition himself. The demolition is currently in progress and no demo notifications have been submitted. The properties are 307 NE 58th Street and 5720 North Oak Trafficway in Gladstone. 307 NE 58th Street is a commercial property, caller doesn't know what it was previously used for. 5720 North Oak Trafficway is a former gas station.								
Comments A Letter of Unsatisfactory Findings has been issued to Environmental Consortium and Jatin Properties, LLC for failure to amend the demolition notification.

Monthly Air Pollution Control Program Detail Report
Concerns Investigated Between
February 16, 2021 and March 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	45459	Concern Info	The company is located directly across the street from my house. The name of the company is "Sutton Trucking." When we first bought our house, the huge huge building was not there, and we never experienced any problems with dust or the continuous semi trucks coming and going all through the night. It was quiet.					
			About 2 to 3 years ago, they built a huge building and railway to the building. Now its loud and busy, and the dust is extreme all the time and year round. Of course, right now you won't find dust blowing because it has rained recently.					
			My 7 year old daughter has allergies and is prone to getting sick easily. Also, I have spoken to my neighbors and they would be willing to chat as well. We all feel the same way about the excessive dust.					
			I would like to add that the daycare (Learning Castle) that you can see pictured in the attachment is located on Main Street. My children attend this daycare, and the daycare is willing to speak to you as well about the dust issue. They cannot allow the children to play outside sometimes because of the dust.					
			The neighbor who lives behind me is Jason Norton. He is on the Archie city board and has made complaints about the dust as well. He would be willing to speak to you as well.					
Comments	No fugitive dust was observed during the investigation; however, conditions were not favorable for dust creation. Information submitted by the concerned party indicate likely past violations of the Department's fugitive dust regulation. Requirements were discussed with the responsible parties, who agree to implement corrective actions.							
	Mt. Carmel is in the process of determining if they need a construction permit. KCRO is also looking into the matter.

Concern No. 45462 Concern Info Voicemail left on KCRO main line: I'm calling to complain about the AA Quarry on AA, South of 50 Hwy, Kingville address b Lone Jack. There is a gray cloud sitting on AA Hwy because of this quarry. You can't drive down this road without this gray cloud of dust coming off the quarry. You people gave them this permit. You made the laws, make them comply. It's unhealt and you people do nothing about it.								
Comments No fugitive dust issues were observed during the investigation.								
NERO	2/23/2021	2/22/2021	Country Club of Missouri and Little Dixie Construction	Columbia Boone	Asbestos	DB		
Concern No. 45359 Concern Info Little Dixie Construction is renovating in Country Club of Missouri without checking for asbestos. Renovations are due to water damage following fire suppression system pipes bursting.								
Comments Violation of the Asbestos rule - failure to inspect prior to renovations. LOW to be issued to owner and operator.								
NERO	2/23/2021	2/23/2021	Earthworks Excavation	Columbia Boone	Fugitive Particulate Matter	DB		
Concern No. 45360 Concern Info Caller reported the demolition of the old MFA on Paris Rd is causing fugitive dust to blow throughout the neighborhoods nearby.								
Comments Observed demolition of concrete elevator using wrecking ball and crane, noted minimal dust which did not visibly leave the property.								
NERO	2/25/2021	2/25/2021	Emery Sapp and Sons	Columbia Boone	Particulates Open Burning	SB

Concerns Investigated Between February 16, 2021 and March 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 45313 Concern Info Caller reports that Emery Sapp is burning brush from land clearing near the Midway Truck stop and ash is falling on his newly painted vehicle. Also, burning is taking place 24 hours a day. Comments Contacted Boone County Fire Department and they responded on-site. Found no illegal burning and no ash blowing off the property. No violations at time of the investigation. Made recommendations for practices to keep ash from blowing off the property.								
NERO	3/3/2021	3/3/2021	Republic Services Jefferson City Landfill	Jefferson City Cole	Odor	DB		
Concern No. 45387 Concern Info Algoa Road in Jefferson City and have sensed a stench in the area on a number of occasions over the last couple of years was particularly strong during the Summer of 2020. I recently sensed it again when the temperatures started increasing. Comments No violation of the odor rule found during investigation								
NERO		3/3/2021	Mr. Dane Morgan	Green Ridge Pettis	Open Burning	SB		
Concern No. 45526 Concern Info There was a fire Saturday night in Green Ridge. Some hay caught on fire and they pushed it out of the building into the street and it is still burning. Can something be done about the smoke and smell? Comments The fire was an arson fire not set by the owner. Efforts are being made to extinguish it. No violation of the open burning or odor regulations.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 45656 Concern Info Last week on Thursday (Feb 25) night there was very bad air quality around 634 E McCarty so that caller was unable to breathe easily, and again on March 2 at 9 pm there was the same toxic smell.								
Comments No violation of the open burning or odor regulations was identified during the investigation.								
NERO	3/11/2021	3/9/2021	Brad Osborn	California Moniteau	Open Burning	SB		
#210013								
Concern No. 45547 Concern Info EER was notified by the Moniteau County Sheriff's office of a fire that was occurring just south of California Missouri. The site (32572 Highway 87, California) also contained a large pile of construction waste that was burning and EER's presence was requested by local officials. EER responded and made contact with local fire and provided some technical assistance in regards to firefighting efforts. Upon further investigation it was determined that this site is currently in enforcement for the construction waste and is also under investigation for other environmental complaints. Local fire at around 18:00 hours determined that no further extinguishment could be done and the fire was going to have to burn itself out. Local fire was going to burn the vegetation around the piles of waste to prevent spread. Firewater runoff was not leaving the property at this time. Investigation by the local fire department indicated that the burning of household trash and dry ground fuels lead to the spread of the fire to the large piles of waste.								
Comments Issuing RNOV #210013 for open burning of shingles in violation of the Missouri Open Burning Rule 10 CSR 10-6.045.

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 45777 Concern Info Caller reports at least three truckloads were hauled from the Edina apartment demolition on Lafayette St and burned somewhere around Gorin. Caller also stated debris had been dropped along the highway from unsecured loads.								
Comments Violation of the asbestos rule - failure to inspect and failure to notify. Unable to determine compliance with solid waste management and open burning regulations.								
SERO	2/24/2021	2/22/2021	Timber Ridge Landfill	Richwoods Washington	Odor	JE		
Concern No. 45287 Concern Info SP:28396 CP called to say that the odor from the landfill got really bad Friday night. The CP started getting a scratchy and sore throat on Friday, but she just thought maybe she was getting sick. Saturday morning it was odor was some better, but then late Saturday it got worse. Sunday morning when she awoke the smell was in her house. CP says it appears the odor is released at night.								
Comments Attached is an excel sheet that covers the dates that I have visited the area regarding an odor concern. On this most recent visit I arrived to the area c 2/24/21 around 1:45 P.M. While in the area I spoke with Denis of the Timber Ridge Landfill. He did mention that the main valve of the gas line froze due to the freezing temperatures. This lowered the efficiency of the flare for several days. While I was in the area I noticed an odor at the entrance of the landfill. It was below the 2:1 dilution threshold while using the nasal ranger. I spoke with the concerned party on 2/26/21 to let them know what I found requested that in the future they track the day and time of day they detect an odor.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 45585 Concern Info SP:28438 RP is burning tires and oil and other fluids from salvage cars. He was turned in last year but has continued to burn since then. The CP would like to be contacted regarding this issue. He has photos he would like to show someone.								
Comments At the time of my investigation, no open burning was observed. No evidence of such activity was obtained. Multiple photographs were sent by the Concerned Party. I warned both Michael Emory and Steve Henley that they are co-responsible for any open burning that occurs on this property. Additionally, I explained that fines can result from the open burning of tires. Michael Emory was contacted on March 19, 2021. Michael Emory stated that he does operate a Tire Shop in Steele; but he does not open burn tires; but has ran off some people who were burning on the property. Michael Emory stated that he sends scrap tires to the junkyard inside the scrap cars he ships for recycling to J.W. Walker and Sons in Poplar Bluff, Missouri.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	45381	Concern Info	SP:28523 CP called to report a open burning. The CP did not know who is burning or what was burning, but whatever was being bur was burning her eyes. CP stated she contacted Butler County Sheriff's Office and they are suppose to come out. CP said we can call the Sheriff's office to get more details.					
Comments	This fire was a controlled burn that was conducted by the United States Department Of Agriculture Forest Service to manage 2,000 acres of forested area in the Mark Twain National Forest. This activity is exempt per 10 Code of State Regulations 10-6.045 Open Burning Requirements (3)(I) which exempts the open burning of material associated with agricultural or forestry operations. The concerned party was primarily concerned with whether or not the fire was going to burn her home or if some authority was controlling it. The concerned party received an afternoon call from the Sheriff's Department letting her know that this fire event was a controlled burn. This call greatly alleviated her concerns.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	45510	Concern Info	SP:28627 CP has several complaints about the same property. Large Brush pile near very old unlivable home and the CP is concerned the RP is going to set fire to pile and house at the same time and the house has asbestos siding and shingles RP lives in campers w/o proper septic system. CP states the campers never move so the RP must be dumping the septic where they are and the rain is going to cause it to run onto the neighboring property. Trailer full of burnt rubble has been pulled on RP property and a tarp is put over it with tires on top of the tarp. CP is concerned the RP will be adding this rubble to the burn pile started near the old house and going to burn it all together. CP didn't want to leave name and wanted to be anonymous but did leave their cell number for the investigator assigned to this to call them when they get the concern.					
Comments	At the time of the investigation, no violation was observed. It was apparent that the open burning had not occurred. No one was on site. I left my business card on site and followed up with open burning fact sheet and regulatory information by mail.

Concern No.	45528	Concern Info	SP:28627 CP has several complaints about the same property. Large Brush pile near very old unlivable home and the CP is concerned the RP is going to set fire to pile and house at the same time and the house has asbestos siding and shingles RP lives in campers w/o proper septic system. CP states the campers never move so the RP must be dumping the septic where they are and the rain is going to cause it to run onto the neighboring property. Trailer full of burnt rubble has been pulled on RP property and a tarp is put over it with tires on top of the tarp. CP is concerned the RP will be adding this rubble to the burn pile started near the old house and going to burn it all together. CP didn't want to leave name and wanted to be anonymous but did leave their cell number for the investigator assigned to this to call them when they get the concern.					
Comments	At the time of the investigation, no violation was observed. It was apparent that the open burning had not occurred. No one was on site. I left my business card on site and followed up with open burning fact sheet and regulatory information by mail.

Concern No.	45584	Concern Info	SP:28614 Recycling Works					
			For a few days they were getting rid of some debris and now they're burning the rest of it. They are burning it right now (8 a.m.) and there black smoke all over the place. CP is not sure what kind of debris they are burning but it looks pretty nasty. He assumed they're burning whatever they can take to a landfill or get rid of however else they were trying to get rid of.					
Comments	At the time of this investigation, several brush piles were noted on site. I took photographs and left my business card.							
	On March 22, 2021, I interviewed Aaron Espinoza, President of the Citizens Bank of the Midwest in Rolla, since the bank owns the property. Aaron Espinoza stated that the bank has been cleaning up the property. Some cardboard and brush were open burned on site. Otherwise, the former owner hauled much of the material to another location for storage. Materials hauled included plastics, barrels, packing peanuts, etc. Additional materials were taken to the landfill by the bank. It is intended that the site be cleaned up and then sold, since the building is still in good shape according to Aaron Espinoza.							
	I e-mailed two fact sheets, (Facts on Open Burning Under Missouri Regulations, Managing Construction and Demolition Waste) and the pertinent open burning regulation (10 Code of State Regulations 10-6.045 Open Burning Requirements) to Aaron Espinoza.

Concern No. 45441 Concern Info Forwarded from City of St. Louis: "The stench being released into the air from Stericycle from their process is becoming unbearable on some days. Stericycle is located: 6240 McKissock St. Louis, MO 63147" Comments I visited the site in the morning hours of February 23, 2021. It was a sunny day and the wind was calm. I met the plant manager. I explained the reason of my visit. I walked through the facility with him. I observed the emission points (the two autoclaves, and the chlorine/water mixture disinfecting unit). also observed the on-site waste water pretreatment plant permitted to discharge and monitored by MSD while the plant was in operation. I went outside and walked around. There was no odor coming from this facility at the time of the visit. The area is an industrial area. The nearest residential area is more than a mile south of the facility, past I-70. There is a waste solution company located half a mile west of Stericycle on the same street. I drove by there with my car windows open. I did not smell anything in particular at the entrance gate of the waste solution company either.

Concern No.	45436	Concern Info	I have a question on School bus idling. I was seeing if the law includes St. Charles county. What the law includes. The Francis Howell school district is building a new high school and the bus drop off will be in my back yard. The lot will start about 58 feet from my property line. I am concerned about the pollution from the buses waiting to drop off and pick up. Thanks (see SharePoint for full report)					
Comments	No ongoing violation of the "Idling Rule." Sent email response: Mr. Steve Birk, Thank you for inquiring with the following: "I have a question on School bus idling. I was seeing if the law includes St. Charles county. What the law includes. The Francis Howell school district is building a new high school and the bus drop off will be in my back yard. The lot will start about 58 feet from my property line. I am concerned about the pollution from the buses waiting to drop off and pick up. Thanks" The Idling Rule (10 CSR 10-5.385, "Control of Heavy-Duty Diesel Vehicle Idling Emissions) does apply to diesel-powered school buses as a part of minimizing their emissions. This rule, however, doesn't apply to gasoline-powered vehicles. Diesel-powered buses are limited to 5 minutes of idling, except when needed for maintaining safety such as for inclement weather to run defrosters, but could idle for up to 15 minutes per hour to maintain passenger comfort. As you can see, not much can be done with the Idling Rule to completely eliminate these emissions but at least there have been some recent improvements in new diesel engine emission standards, being realized as fleets turnover. And, it is not too unforeseen that school bus fleets could start transitioning to electric. I don't know of any setback requirements for the school operations you expressed concern about and it would instead be up to local zoning rules. But, you observe a violation of the Idling Rule, please feel free to report it to our office. Thank you.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Comments	<p>I visited the site on the PM hours of March 8, 2021. I met Tim Myers, Director of Facilities (636-278-2221 ex 1337) and Elliot Schneider (314 570 2931 who oversees the composting operations.</p> <p>I told them that 3 odor complaints were received by St Louis Regional Office in the last two weeks and asked them if they noticed odor or if they received an odor complaint from the public. They told me there was no odor complaint they received from the general public after the aeration issue of the two holding tanks was resolved by injecting more oxygen into the oxidation ditches using aerators (this is costly to the City) following several complaints in 2018 that originated from the stores located at the north service road to I-70.</p> <p>Elliot Schneider indicated to me that the city obtained a permit from the Missouri Department of Natural Resources Solid Waste Program to blend the yard and biosolids to make compost in 1996. They also have Operating Permit No MO-0030970 issued by the Department and are in compliance with the permit condition.</p> <p>We walked through the facility and observed:</p> <ol style="list-style-type: none">1. The process where the biosolids (byproducts of wastewater treatment process) are dewatered to turn in to a material ready for composting in a building next to the compost facility while the press was in operation.2. The newly installed automated aeration system designed to reduce odor from turning compost in 8 separate bins/bays which allow air to be pumped in and out of the compost piles releasing less odor while breaking down the materials. The system was in operation at the time of the visit.3. The compost placed in horizontal mounds (they call them windrows) outside. There were several windrows at the time of the visit. <p>These operations are inherently odor/smell producing processes. However, there was no odor or smell strong enough to be objectionable to me that would be in violation of 10 CSR 10-6.165 "Restriction of Emission of Odors". To be in violation with this regulation, the odor has to be perceived at a location outside the boundary of the facility.</p> <p>Note from past (April 2018) compliant investigations.</p> <p>In response to several complaints originated from the stores in the strip mall, I went to some of the stores and talked to store managers. I passed the information I obtained from the store managers to Elliot Schneider. Later that week, Elliot Schneider and Kristen Kubat (Five Below store manager) identified the receiving bays connecting the sewer lines to the holding tanks at the wastewater treatment plant to be the location where the odor is coming from, although the connection is underground.</p> <p>The holding tanks (they are open) are located approximately 200 yards from the stores (Five Below, Burlington). As a result, the city started to use air</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	45439	Concern Info	On or about July 15th, 2020 I was working for Mr. John Gross at 3126 Smiley Rd. Bridgeton Mo.63044 Mr. Gross know that I was in the demolition business asked me for a person to give him a survey for his asbestos inspection.A requirement in St'Louis County Mo aand St.Louis County Dept of Health.I observed transite material on the exterior of the house and told him he would need an abatement done by a liscensed abatement contractor. He proceeded with out regaurd for his neighbors or the law did unlawfully remove the transite siding himself with the help of others and th into a container. He also removed materials from the inside of the house and discarded them illegally.He then called for an inspection from Mr.Cletus Agbo who I reffered him to weeks earlier. Mr Agbo told me he asked Mr.Gross about his illegal actions and playe ignorant. St. louis Co.Health after the fact required a air monotor to run for a few days and gave him his release for Bridget Mo.Mr. Agbo took pictures of the bare exterior walls and turned them in with his report, which only showed 1 sq.foot of asbestos. The rest was disposed of priorto the survey. I have been in the demolition business for 20+ years and am held to high standard to report asbestos when it's found even after a survey was performed to higher authorities.Mr. Grosses actio were selfish and he put the general public in danger with air born asbestos dust during his private abatement of approximately 1,000 sq feet of transite siding.Do as you deem nescessary for I felt compeled to report this as aconcerner citizen, no one is above the law and asbestos dust is no joke,people die from it every day.

Comments								
			Email response I sent to Middleton Caruthers on 3-8-21:					
			<p>We received your report below.</p> <p>It appears you worked with the St. Louis County Health Department asbestos compliance staff. I contacted the St. Louis County Health Department and they confirmed having worked on this matter.</p> <p>It appears that Mr. John Gross was the homeowner and removed the siding himself and claimed he was not planning to demolish at the time of the removal. According to St. Louis County, they don't require homeowners to comply their asbestos requirements for renovation work but they are required to meet these requirements for demolitions. The intention would be hard to prove if the presumed asbestos had been removed as a circumvention or if the homeowner actually made the decision to demolish after beginning remodeling.</p> <p>Whatever the case, St. Louis County's asbestos requirements are more stringent than the State's, which is regulating based on NESHAP thresholds and requirements, and the residential structure would have been exempt from the State/Federal asbestos requirements; therefore, the Missouri Department of Natural Resources does not have regulatory purview on this matter.</p> <p>Emails to and from St. Louis County APCP:</p> <p>Tom, I talked to Mr. Gross before he submitted the demolition application to St. Louis County. I have strong feeling that somebody guided him how to avoid all necessary abatement requirements, established by County Asbestos Code for demolition projects.</p> <p>He said he was planning the renovation and then switched to demolition, stating some foundation issues. When we received the demolition application all ACM were removed without abatement permit issued, which was not necessary for owner occupied remodeling projects. The only question I had at the time was the air quality inside the building after asbestos was removed. The contractor provided us negative air samples and the demolition application was released.</p> <p>May be once or twice a year we are facing similar situations with residential properties in our area. (see SharePoint for full report)</p>

Concern No. 45573 Concern Info Forward from St. Louis City (Citizen's Service Bureau Request): Location: GERMANIA ST & ALABAMA AVE "This company in the last couple of days has started producing more smoke than normal and the noise is horrible. Noise has never been a major issue until lately. I know that the city has a noise ordinance and I want this checked."								
Comments I visited the site on 3/12/21. There appeared to be construction taking place in the parking lot, which is likely the source of noise that the concerned party is hearing. I told the City of St. Louis that we do not regulate noise, but I would look out for opacity and fugitive emissions. I did not see any significant fugitive dust around the property. I observed a large amount of steam, but no smoke opacity. Tom Sims will inspect the facility this fiscal year.

Comments I drove past the facility on Friday, March 12, 2021 and did not notice any opacity coming from the orange building. I contacted Charles Brown, Operations Manager, on March 18, and asked if they were aware of the smoke, what caused it, and what has been done to prevent future occurrence received an e-mail back from Susan Kerr the same day, explaining the issue: "Mr. Ruby We are aware of the complaint, the lady concerned called us here as well. A fan in that building went out that circulates the air up and out and as soon as we realized the fan was not working we stopped burning until it was repaired. After she drove past here she went to the fire station up the street and informed them that we had fire coming out of the building, there was no fire coming out of the furnace. The smoke had dissipated by the time the fire department arrived here to put out the fire and since there were no flames associated with the smoke they just got back in their trucks and left. I did let the lady know that we do have the proper permits and that we only burn what we are allowed when we are allowed and that it was just a malfunctioning fan that caused the smoke to hover and not go up our appropriate smoke stack and that the fan was being repaired before we would start burning again. We are adding the fans to our list for preventative maintenance so that we will know before we start up the furnace if there is an issue, as that day a blade was struck by debris from the roof that caused the malfunction. Please let me know if you need any further information." I spoke with Lemma Zewdie, the most recent inspector, and e-mailed Susan back: "Susan, Thank you for the explanation. I will go ahead and close out this concern seeing as you have had contact with the concerned party and have identified and addressed the issue. I discussed the opacity exceedance with Lemma Zewdie and we agreed that no further action is required on our part at this time, and that you may continue your current opacity monitoring schedule. However, please make sure that you make a note of this event on your 2021 Annual Compliance Certification." Susan responded, "Ok thank you, I have included our environmental company we use for the compliance and EIQ so he can make note for next year's reports."

Concern No. 45237 **Concern Info** A guy is taking a bunch of construction junk that he is bringing to his property and starts burning it just at night. He will bring in about 4 - 5 loads of shingles, construction lumber, and tires that he brings in a day and then just around nighttime he lights them on fire. This has been going on for about 1 year. CP has seen it only twice, but believes it happens far more frequently depending on how much debris he hauls in every day.

Mark Henry with MDC knows about this and is willing to help as well.

Mark Henry - 417-543-5990. He knows the property and the RP personally

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	45258	Concern Info	The anonymous concerned party called in a concern that litter from a 500' long chicken egg barn with approximately 20,00 chickens at the Zachary Headings residence is causing extreme odors several times per year. The owner of the barn stockpiles the chicken litter throughout the year, and the odors are caused every time the barn is cleaned out and when the litter is stockpiled. The litter pile sits all summer long and stinks really bad. The most recent time the barn was cleaned out was yesterday (2/17/2021), and there were extreme odors at that time. The litter pile is also exposed to the elements, and is washed off the property, as well. One of the neighbor's ponds was reportedly ruined because of the chicken litter runoff. The litter is sometimes spread, but when it is spread it is done in a manner where the litter is spread in front of the neighbors' homes and property and creating extreme odors in their homes. One other concern that was reported, was that the dead birds from this chicken operation are not incinerated, but the dead birds are placed in feed sacks and are disposed of in his dumpster.

<p>Concern No. 45455 Concern Info I received an anonymous call stating that a tire dump off of Old Marvin Rd just southeast of Versailles and west of 52 is burning tires. The caller stated they have called it in several times and everytime DNR goes out nothing is done about it. TI caller stated the smoke is so bad that their family along with their pets have to leave their property. Neighbors also leave the area. The caller stated you can miss the tire dump, but it appears the RP maybe located somewhere south of 15670-15671 Old Marvin Rd., Versailles, MO. They also stated that they are worried not only worried about air, but their pond where they like to fish is down grade from the burn pile.</p> <p>The caller seemed very upset they can keep doing this with no action taken</p> <p>Comments See SharePoint #28511 - No Violations</p>								
SWRO		3/5/2021	David Brooks	Ulman Miller	Open Burning	RM		
<p>Concern No. 45351 Concern Info CP called again on this ongoing issue. CP reports that somebody is burning again in Mr. David Brook's place. CP reports that they are burning white plastic and it smells terrible in his house</p> <p>Comments See SharePoint #28532</p>

Concerns Investigated Between February 16, 2021 and March 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	45372	Concern Info	Mayor Timothy Blankenship reported illegal burning is taking place at 341 E Wright and 217 E Tarrant in Stotts City. Stephanie Foster owns the home at 341 E Wright and her son Zane Foster currently lives in that house, and may work for Herbert Tune. Herbert Tune owns Donkey Towing, and Tune is reportedly burning tires, carpet, and other trash in Zane Foster's yard. Some of the trash burned may be trade waste from Donkey Towing. There are also two 18 foot trailers full of trash located at 341 E Wright that Blankenship was also concerned might be burned in the future. Some burning occurred yesterday at this location, and Blankenship has photos of that. Tune also burns trash in his backyard at 217 E Tarrant.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
SWRO	3/15/2021	3/9/2021	Rayburn Webb	Versailles Morgan	Open Burning Scrap Tire Dump	RM		

Concern No. 45408 **Concern Info** Old tire dump experiencing a fire, subsurface. Apparently there was a clean up back in 2016 of the area and several loads tires were removed. The RP is upset saying he has a letter letting him know there was an old tire dump on the property but apparently he thought all the tires were gone. He had a household trash fire that got away from him and lit the tires subsurface on fire on 3/5 or 3/6 2021. This concern was forwarded from EPA through APCP on 3/9/21

EER spill line also received a call on 3/9/21 by the Versailles Rural FPD, Chief Trowles - 573-789-2231. Chief Trowles was concerned about toxic runoff of the water used to put out the fire. Steven McClain assured him that the main goal of the Fire Dept. is to put out the fire and they would not be liable for any runoff from that activity. Trowles told McClain it is no longer smoking at this point.

Concern No. 45414 Concern Info CP reports neighbor burns moldy hay and smoke causes CP to leave home and wait in car. Smoke causes burning eyes, nasal issues, throat issues. Neighbor unwilling to move hay and whenever CP brings up the issue the RP moves the hay bales closer to their property. Parcel search shows RP's address as 234 Hudson Rd Pineville, MO. Second CP called in shortly after to report the smoke from the burning hay has been causing issues with their sleep apnea machine and affecting the CP's ability to breathe. I provided the second CP with the case number.

Concern No. 45456	<p>Concern Info received a call from the Eldon Chief of Police about a burn site behind the At Ease Property Management business at 2004 Business 54 South in Eldon, across from Lloyd Belt dealership.</p> <p>The property owner, Mr. Aaron Duncan 573-528-7703 was with the chief relaying the information about 3-5 acres of trash, shingles, tires, etc. all shoved in a ditch behind the business. Some of the shingles were already burnt and added misc. debris to the pile now. He's assuming the tenants are going to light the pile and leave town.</p> <p>The tenants/responsible party of At Ease Property Management is Randy & Jessica Hendrix.</p> <p>The Eldon FD previously responded to a fire on 12/29/20 at the same site with flames of 25 foot high.</p> <p>Comments See SharePoint #28660</p>							
SWRO	3/19/2021	3/15/2021	Tony Hammond	Long Lane Dallas	Open Burning	RM		
Concern No. 45458	<p>Concern Info ?This property is literally covered with hot tubs, covers, misc. junk and his living quarters caught fire and many of the tubs were burned releasing a terrible odor. He has burned some before which was bad enough but the quantity that burned last night and some today is intolerable. He still has many that could catch fire.</p> <p>Comments See SharePoint #28664</p> <p>No violations</p>
